Frontier Spirit

Nagoya University of Commerce & Business

EARNED EXCELLENCE

THE BEST BUSINESS SCHOOLS
IN THE WORLD

Sending pioneers to the more than 50 years

Frontier Spirit

To spread frontier spirit is the base of our education both in principle and method. Our institution was established to create a path for the students who come to study to let them develop themselves and create a field where they be flourished.

~ From the words of Dr. Yuichi Kurimoto, the founder~

Dr. Yuichi Kurimoto
Founder

- 1953 Nagoya University of Commerce & Business founded
Department of Commerce under Faculty of Commerce (Nagoya city Showa ward Hiroji campus) established
- 1957 A non-degree seeking year-long commerce program opened
- 1962 Department of Industrial Management established
- 1968 Relocation to Nisshin campus began, pioneering the suburb relocation of university campuses
- 1976 Computer Center opened
- 1978 Central Information Center (general library) opened
- 1981 General Language Education Center opened
- 1984 Department of Management Information established
- 1985 Department of International Economics established
- 1986 Campus LAN completed
- 1988 Intelligent School Building (IS building) opened

- 1990 Graduate School (nation's first Graduate School of Management Information) opened
Began giving home computer to all incoming freshmen
- 1992 Launched an exchange program with the Chinese University of Hong Kong
- 1993 Launched an exchange program with Chulalongkorn University of Thailand
- 1995 Signed an agreement on educational exchange with Beijing Foreign Studies University
Korean and Thai courses opened
- 1996 Study Abroad Scholarship inaugurated
- 1998 Faculty of Foreign Languages and Asian Studies established
CGC Building (Center for Global Communications) opened
New study abroad program (Frontier Spirit Program) inaugurated
- 2000 Nagoya Station Satellite Campus opened

2000 Millennium Gate (front gate)

- 2001 Graduate School Fushimi Campus opened in front of subway Fushimi station

2003 50th Anniversary Pole

- A 50-meter tall flag pole to commemorate the 50th anniversary of the campus.
- 2004 Graduate School of Management established
- 2005 Graduate School of Accounting & Finance established
New study abroad program (Gap Year Program) inaugurated

world for

2006 **Accredited by AACSB International**

Became the second accredited institution in Japan after the Keio Business School.

2008 Faculty of Economics established
Department of International Studies established

Certified by Japan Institution for Higher Education Evaluation (JIHEE)

2009 **Accredited by The Association of MBAs**

Became the nation's first and only institution with dual accreditation.

2010 **International Education Research Center**

The International Education Research Center will open as the crossroads for international exchange in a quiet residential area of Nagoya City. The Center will help us expand our international research and scholarly initiatives, thereby helping us to promote one of our main core values: internationalized education.

To be a world-class university that the world needs

Dr. Hiroshi Kurimoto
President

These are very exciting and new times for management education. The traditional, hierarchical system of mainstream Japanese businesses is becoming a thing of the past. Our society has been experiencing profound changes, including the structural collapse of major enterprises, compelling them to rethink the future and adopt a more practical and modern vision. Consequently, the concept of lifetime employment is no longer the only choice offered to the younger generations.

More than ever before, business acumen, sound financial knowledge and the need for languages are woven into every aspect of our daily lives. The demanding world is also growing accustomed to relying on multi-skilled leaders and entrepreneurs to bridge the gaps in countless ways.

NUCB is committed to helping students by teaching and working closely with you in order to achieve your professional goals and meet the challenges of your professional life in the 21st century. Upon graduation, you will use your expertise to enhance a truly meaningful communication at the international, national and community levels.

We encourage you to visit or contact us if you are interested in pursuing studies that will help determine your future. Please also contact our faculty for any questions you may have about our programs. We sincerely look forward to meeting you and welcoming you at NUCB.

Where World-Class Edu Become Reality

What are the keys to be active on the front lines in business both domestically and internationally?

They are scholarship, a wider vision, flexible ideas and the ability to respond to social changes.

At our university, teachers are full of rich practical experience and are able to pass the knowledge on to you in the areas of study that are directly related to succeeding in business.

Diversified programs such as the 3+2 master's degree scheme in business administration and the double major scheme are available as well. You will improve your potential to fight at the forefront in business.

Off Campus Dormitory

Everyday experience is the very cultural experience

The dormitory in Nagoya city is an ideal place for those coming from abroad to live. The everyday life in the surrounding area will let you have a lot more than just a grasp of Japanese culture. Once inside, thanks to Japan's thick aseismatic concrete walls, the dormitory is very quiet, providing you a place for study and good rest.

JASSO Scholarship

One great support for your study abroad in Japan

JASSO (Japan Student Services Organization) offers scholarship to those who come to Japan to study. Visit JASSO web site at http://www.jasso.go.jp/index_e.html to find out if you qualify for any. Those who will be coming to NUCB on an exchange should ask your home institution to send a recommendation to us to nominate you for JASSO scholarship.

Faculty of Communication

Department of Modern Liberal Arts

Department of International Communication

Our university will develop truly international people through foreign language as a tool and implementation of a liberal arts education.

In today's world, social, cultural and economic activities surrounding human beings are diversified, and there are so many complex issues, such as environmental issues and political issues. In order for us to “stand on our own feet” in this society, we must have the ability to pluralistically grasp the modern society and communicate with people having different values. It can be said that this is a basic ability as a social person or, in other words, a communication ability, which enables us to identify these issues from various viewpoints, to have rich knowledge and cultural learning and flexible judgment for responding to such issues, and to proactively participate in society. It therefore becomes necessary for us to accurately grasp events and issues from different perspectives and respond to them in a flexible manner, without being caught by one theme or area only. We aim at developing a truly international person with an ability to smoothly promote business by respecting another person's position and with a capability of finding and solving issues by sharply grasping the rapidly changing states of the world.

Department of Modern Liberal Arts

Since this department aims at giving students a basic ability as a social person that is required by society, with its focus on communication ability, it provides a liberal arts education beyond the areas of natural science, social science and human science. We also challenge to develop human resources capable of contributing to the establishment of a better society by seeking harmony with different values. We aim at developing human resources who know society, have rich knowledge and a flexible sense of judgement required by society, and capable of proactively participating in and moving around society.

Department of International Communication

Just as the title indicates, this department is a department to learn English as a communication tool. Its goal is to develop a high ability of English that can be used for international businesses, in addition to general English conversation ability. For this purpose, a small class headed by a native-speaker teacher is organized, where lectures are given without using Japanese at all. Ability of using practical English will be acquired through expressing one's opinions in English, having discussions in English, organizing one's thoughts in an essay, acquiring business manners of world standards, and preparing business documents in English. You may also learn a second foreign language such as French or Asian languages like Chinese and Korean. Furthermore, we will also focus our efforts on the liberal arts education such as culture, history, economic situation and political system, as well as on the education of languages as a means of communication.

Learning new knowledge in an amazing country

LITHUANIA

Sarunas Bruzge

Undergraduate 2009

Japan is simply amazing. I think that this country has one of the most interesting history and its culture is truly different from the others. Before coming to study here I was afraid of the possible cultural shock. However, I can state now that my fear was worthless as Japanese people are very kind, helpful and friendly.

NUCB itself is a place where you can spend all day. Lecturers are interesting and they are capable of passing knowledge to the students.

Faculty of Commerce

Department of Accounting & Finance

Department of Marketing

**New power for handling highly complex businesses,
an epoch-making approach toward a modern
version of “commercial science”.**

Highly globalized / IT businesses will sometimes bring about drastic changes: take for example, the recent financial crisis. There are many entities undergoing a major reorganization by taking a chance in this situation which has been called the greatest economic crisis of the century, and has increased our interest in the modern version of “commercial science” that is able to handle highly complex businesses. This faculty has adopted an innovative approach that is not seen in other universities, whereby you may take a comprehensive course of studying accounting / finance / marketing. We will support your career to any industry or area, such as licensed tax accountant, certified public accountant, finance, securities, corporate management, distribution, trading company, services, advertising and sales promotion.

Department of Accounting & Finance

You will learn the skill of accounting which is called a “business language” and the ability of reading the performance of an entity from its financial data. By learning the basic theory of finance, you will also acquire the ability of analysis, assessment and management judgment that are useful in an entity's financial department and financial industry. Furthermore, under a unified undergraduate and graduate school education system, we have introduced a curriculum collaborating with the graduate school education, thus providing our students with sophisticated and practical education. As a result, we offer an optimum learning environment to students who wish to enter into the financial industry or highly professional jobs such as licensed tax accountant, certified public accountant and financial planner, and develop such specialists as are equipped with professional knowledge in accounting, finance and corporate finance whom the companies in Japan are seeking.

Department of Marketing

Practical ability in marketing is required in order to look at the market and find out consumers' real needs, embody them in products and services, develop / promote sales strategies for such products and services, and distribute them in the market. In order to acquire such ability, we not only offer theoretical studies but develop information utilization skills, presentation skills and communication skills that are required for marketing practice by using abundant practical examples, as well as cultivating the sense and practical ability in marketing.

Courses in Japanese and English matched my career path

FRANCE

Aude Salmon

Undergraduate 2009

I'm fascinated by this country and I really enjoy living in Nagoya. I began studying Japanese last year and I appreciate the fact that courses are offered in Japanese and English. I would like to work in the marketing area and I have no doubt that command of both of these languages is a distinct asset in that line of business. Being a student at NUCB is an unrepeatable chance for me to study at a real business school where lessons are fitted with my vocational scheme.

Faculty of Economics

Department of Economics

Developing a true economic person who solves issues on a broad and global perspective.

Economics is a science that has grown for realizing an affluent society through studies in economic activities (production/exchange/consumption) of mankind. As compared to business administration which approaches individual entities and looks at events from a “micro point of view”, economics looks at Japan/world as a whole including individual entities from a “macro point of view”. It covers international economy, business trends, stock market, financial issues, financial policies, population issues, labor issues, environmental issues, etc. as its research themes, and aims at verifying / understanding these issues in a theoretical manner and proposing appropriate solutions.

Department of Economics

By taking advantage of the strength of this university, we offer education that focuses on market economy.

You will mainly learn about business-to-business transactions, labor issues, financial transactions, behavioral economics, etc. You will also learn about social security, environmental issues, labor issues, etc. in order to deepen your understanding of the economic activities of the central government and local governments. The characteristic feature of our study is that we have introduced a curriculum of “behavioral finance” that tries to explain irrational behaviors of human beings from a psychological approach, in addition to general “economics” standing on the presumption of rational behaviors of human beings. Furthermore, we focus our efforts on developing persons who are able to utilize “intellectual properties” in a strategic manner, through having our students acquire professional knowledge relating to properties with value, i.e. “intellectual properties” such as technical inventions and ideas that generate from entity's economic activities, unprecedented business models, computer software, product designs, brand names, logo marks, contents such as music and images, customer information, etc. As such we will develop “true business persons” capable of taking an active role at the forefront of business, through having our students study economics broadly and deeply, deepen one's thoughts on various economic phenomena, and acquire the ability of making decisions and conveying them in an easy-to-understand manner.

Get it all here at NUCB

GERMANY

Alexander Goetmann

Undergraduate 2009

My reasons for a semester abroad at NUCB were: 1) to experience the great culture of Japan and to see the harmonic coexistence of tradition and modernity, 2) to receive a high quality education to take full advantage of one of the leading business schools in Japan in order to excel at my studies, and 3) to experience a multicultural and dynamic learning environment. I have a great time in Japan and I am really thankful for the excellent service of all members at NUCB.

Faculty of Business Administration

Department of Management

Department of Management Information Science

Moving business through the use of organization and information. Developing new management / entrepreneur skills that are in step with the times.

Business administration is a practical science closely related to the actual business society. The Business Administration Department develops management/entrepreneur who take an active role in the changing business community, by having its students learn the latest content of almost the whole areas of business administration, including management strategies, management of personnel and organization, accounting and finance, marketing and management information. The Management Information Department provides its students with balanced education in both areas of corporate management and information technology, and develops a specialist of management with the capability of highly utilizing information.

Department of Management

You will learn how an ideal entity or industry should perform in order to respond to changes in society. You will study how an ideal entity or industry that is expected by society should be, not only by looking at the management of an entity, but by grasping an entity image within a large framework of society. Through a style of learning about an ideal society and entity from a broad perspective, we will develop a business leader with an ability of fostering changes toward a desirable future.

Department of Management Information Science

At the present time when the Internet is very widely used, it is essential to collect highly accurate information and develop strategies in addition to the knowledge on corporate management and business, in order to run a business or start a new business. Under the guidance of teachers coming from companies with excellent IT environment and rich practical experience, you will learn about the design and method of operation of the information system useful to business management. You will also cultivate your specialized skills (programming, database management, network technology, information security, computer graphics, web design, etc.) required for that purpose.

An unforgettable experience

BRAZIL

Vanessa Yang

Undergraduate 2009

Choosing to come to Japan for a study abroad at NUCB becomes an easy decision once a person thinks about Japan's unique characteristics-the food, the culture, its history, people, and high social morale. Likewise, NUCB's position as a renowned business school made my choice a certain one.

The people I've met so far have made this experience already unforgettable.

NUCB is excellent

SAUDI ARABIA

Hakeem alQassem

Undergraduate 2010

NUCB is a very good university and I am proud to study here and earn knowledge on a very high level.

Being a student at NUCB is an unrepeatable chance for me to study at a real business school where lessons are fitted with my vocational scheme.

The NUCB Graduate School

The Nagoya University of Commerce & Business Graduate School is an internationally accredited MBA degree granting institution founded in 1990. NGS opened its modern and spacious Fushimi Campus in the heart of the Nagoya financial district in 2001 to tap a broader market by developing innovative MBA programs. The Tokyo Campus was opened in 2005, followed by the Osaka Campus in 2007. NGS now has nearly 400 students taking various Master's- programs at these three campuses in Japan.

A Leading International Business School at the Heart of Japan

MBA Program

The First and Only MBA in Japan Accredited by AACSB and AMBA

EARNED EXCELLENCE

THE BEST BUSINESS SCHOOLS
IN THE WORLD

MBA Overview

Excellence is a hallmark of NGS, and our MBA degrees support that tradition with a highly innovative and rigorous educational program. The cornerstone of the NGS tradition has always been to help business people become valued leaders in their chosen field. Moreover, our program was designed to provide ample opportunity for MBA candidates to develop the skills and thought processes necessary to effectively manage changing technological environments. It is an integral part of the teaching and training approach to expose our students to the social, environmental, political, ethical, and international factors shaping the global marketplace.

Tokyo Campus

Osaka Campus

Nagoya Campus

The goal of the MBA program is to instill in our students the motivation for embarking upon or enhancing successful and rewarding careers in global business environments. Our faculty and staff members provide students with the knowledge and skills needed for future employment and leadership opportunities.

Types of Programs offered

- Weekend MBA® — part-time Japanese
- Global MBA — part-time English

The main academic program offered in Japanese is the Weekend MBA® program. This part-time mode is a postgraduate and post-experience program, and students complete the courses making up the program over one or two academic years of 36 weekend classes (Saturdays and Sundays).

The same content of learning is offered in English as the Global MBA program. This evening-based part-time program is taught in English only in order to diversify students from all over the world, as well as international exchange students from our numerous global partner schools.

Participants must have at least a Bachelor's degree and three-year in-depth working experiences either in private or public sectors.

MBA Design

NGS aims to provide high quality programs in flexible formats to meet the needs of prospective managers and executives wishing to improve their existing skills by earning an MBA primarily by part-time study in either Japanese or English.

The purpose of this program is to develop business leaders with the comprehensive management abilities necessary for corporate reform. Accordingly, all classes are held in evenings or on Saturdays and Sundays, enabling students to continue to conduct their daily business activities; at the same time, the focus is on practical content that the students can immediately apply in the workplace.

Now I can apply both my technical and business knowledge in a post-MBA career

BELGIUM

Eva De Groot

MBA 2008

Studying in Japan, one of the world's strongest economies in the world, offers insight in the Asian way of thinking and how to run businesses. The international dimension of the Global MBA also broadens my social and work-related contacts. The experience at NUCB not only contributes to my management skills, but also enlarges my equally important international and cultural development. Being a top business school in Japan, NUCB has acquired AACSB and AMBA accreditation, which is important for me when leaving Japan to find a job.

Facilities

Nagoya University of Commerce & Business

Stretching out on Nisshin campus, the best environment to learn and enjoy

Place of learning and fostering friendships spreads over a vast ground.
Each can enjoy the fulfilled campus life with the latest facilities and
the most advanced equipment that are IT and internationalization ready.
Now see the unlimited field of potential stretching out before your eyes.

IS Building

IS (Intelligent School) building is the center of information technology-based learning.

CGC Building

CGC (Center for Global Communications) building is a futuristic facility for lectures. Front-line lectures utilizing various media are held.

Central Information Center

More than an ordinary library. Fully equipped with books and Journals as well as multimedia and networking device.

Athletics Field

24

400m running tracks paved with International Athletics Federation certified all-weather urethane. The field with artificial turf can be used as a soccer/American football field.

General Language Education Center

21

The base of foreign language education. Many faculty offices among class rooms make the international atmosphere. Students knock on the office doors for a piece of advice and guidance.

Baseball Field

Uses a special mixture of soil for the right balance of water retention and drainage in infield and long pile (65mm) artificial turf in outfield.

Rugby Field

Uses SRI hybrid long pile (75mm) artificial turf for drastic improvement of performance and safety compared to those of with an artificial turf.

Tennis Court

Seven artificial grass courts. The main court has a spectator stand that seats 300 persons.

International Education Research Center

The International Education Research Center will serve as a guest residence with 44 single rooms. The residence will open in spring 2010. Together with the International Center, rooms for 124 scholars and students will be available.

The Chiyoda dormitory

Security camera equipped, auto lock in each front door (two locks, unlocked with a key card), kitchen, bathroom, toilet, desk, chair, bookshelf, bed, closet, air conditioner, TV set, refrigerator, washing machine, microwave oven for all units

The Chiyoda dormitory is located in a business center: Nagoya city. The 15-story high apartment holds 94 rooms, creating an atmosphere for a new liberal student life. The lush campus life and the urban life can be yours.

Location & Access

Nagoya University of Commerce & Business

Aichi, where rich natural surroundings and traditional industries are

Aichi is known as the ‘manufacturing town’ with its industrial production being number one in the nation. It brings much communication and creation, making Aichi an ideal place both for focusing on study and living a fulfilling student life.

Aichi Prefecture is located near the center of the Japanese archipelago and forms a large base equipped with major transportation network of expressways, railroads, port, airport, etc. It has a population of 7.4 million people (2009), which makes it the 4th largest in

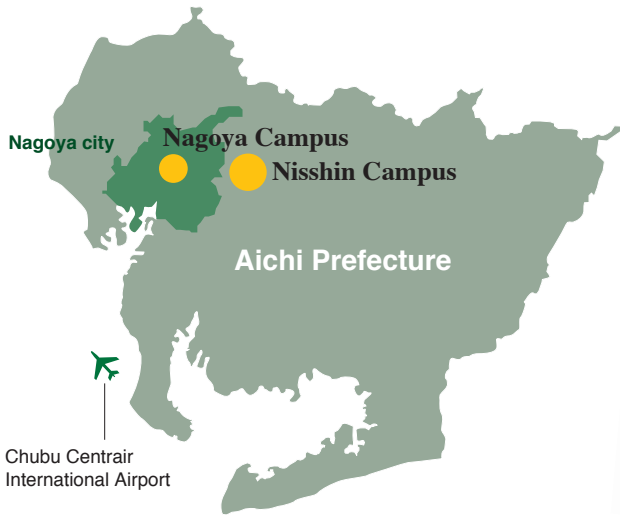

Nagoya castle

Nagoya Station

Japan and forms one of the three major metropolitan areas besides Tokyo and Osaka. It has a balanced development of industry, commerce and agriculture, and is functioning as a driving force in the Japanese economy. In particular, there is a heavy concentration of automotive industry including Toyota Motor Corporation, which is the world’s largest automobile manufacturer, and there is also a concentration of major aerospace related manufacturers like Mitsubishi Heavy Industries. Shipments of manufactured goods amount to 47 trillion and 482.7 billion yen, which occupies 14% of Japan’s shipments of manufactured goods with a large margin of 27 trillion yen more than Kanagawa Prefecture, which ranks second, and these shipments have been the largest in Japan every year since 1977 (industrial statistics for year 2007). Aichi Prefecture has also produced many celebrities as well as being the home of Japan’s civil war commanders like Nobunaga Oda, Hideyoshi Toyotomi, Ieyasu Tokugawa, etc. since ancient times, and has contributed to the building of Japanese culture. As such, Aichi Prefecture has been active in manufacturing and is nurtured by its culture and history, as well as being blessed with excellent geography and a mild climate.

COME AND MEET US

We can offer you a number of different ways to find out more about us.

Often the best way to get a feel for whether or not a programme is right for you is to meet with the faculty, administrators, alumni or current students. For more information on where and when to meet us, visit our website.

You are always welcome to visit us.

Please do not hesitate to contact us if you have any questions.
